ELECTRIC FENCE SYSTEM

Electric Security Fence offers more Ds of security than any other perimeter system:

- Demarcation** - The Electric fence around your property shows you mean business.
- Deflection** - Would be intruders will be deflected to softer targets.
- Deterrence** - The safe, powerful shock is a strong deterrent to intruders.
- Delay** - The physical barrier will delay an intruder, something they do not like.
- Detection** - The voltage monitor warns you of any tampering with the fence.
- Deny** - A well-erected electric security fence will deny entry.
- Dependable** - 60 seconds a minute, 60 minutes an hour, 24 hours a day, 365 days a year, your electric security fence is monitored by an alert, sober, electronic watchman.

What is Electric Fence?

Electric Fence, as the name suggests is a fence powered by Electricity. It constitutes of bare conductive wire supported by poles at regular intervals. The wires give a powerful yet safe shock to anyone who touches it. Shorting or cutting of wires triggers the alarm system.

Where Can You Put Electric Fence?

FENCE TOP

PIGGY BACKING

WALL TOP

FREE STANDING (STAND ALONE)

Z Series Security Energizers:

Every second the Z series energizer discharges a safe, high-voltage impulse for a very short-duration down the fence live wire. The Z series security energizer then monitors the voltage at the end of this live wire, thereby checking that the voltage is being maintained along the entire fence line. In the event of a voltage drop caused by either shorting, cutting or poor maintenance the monitor will trigger an alarm, thus alerting you. Manufactured to meet the most stringent international safety standards, the Z-Range is a class of its own when it comes to features, safety and benefits at an affordable price.
